CONTENTS

VOLUME 125 • NUMBER 1 • JANUARY 2005

1 Olaf Sparre Andersen. *Editorial*

3 Olaf S. Andersen. A brief history of *The Journal of General Physiology*

13 Donald D.F. Loo, Bruce A. Hirayama, Albert Cha, Francisco Bezanilla, and Ernest M. Wright. Perturbation analysis of the voltage-sensitive conformational changes of the Na^+/glucose cotransporter

37 Roberta R. Alfieri, Mara A. Bonelli, Pier Giorgio Petronini, Silvia Desenzani, Andrea Cavazzoni, Angelo F. Borghetti, and Kenneth P. Wheeler. *Letter to the Editor:* Hypertonic stress and amino acid deprivation both increase expression of mRNA for amino acid transport system A

41 Marçal Pastor-Anglada, Benoit Dérijard, and F. Javier Casado. *Letter to the Editor:* Mechanisms implicated in the response of system A to hypertonic stress and amino acid deprivation still can be different

43 László Csanády, Kim W. Chan, Angus C. Nairn, and David C. Gadsby. Functional roles of nonconserved structural segments in CFTR's NH_2-terminal nucleotide binding domain

57 Medha Pathak, Lisa Kurtz, Francesco Tombola, and Ehud Isacoff. The cooperative voltage sensor motion that gates a potassium channel

71 Alain J. Labro, Adam L. Raes, and Dirk J. Snyders. Coupling of voltage sensing to channel opening reflects intrasubunit interactions in Kv channels

81 Michael B. Butterworth, Robert S. Edinger, John P. Johnson, and Raymond A. Frizzell. Acute ENaC stimulation by cAMP in a kidney cell line is mediated by exocytic insertion from a recycling channel pool

VOLUME 125 • NUMBER 2 • FEBRUARY 2005

103 Olaf S. Andersen. The 58th Annual Meeting and Symposium of the Society of General Physiologists: Lipid Signaling in Physiology. (Organized by Donald W. Hilgemann, Scott D. Emr, and Pietro de Camilli)

111 Paul F. Cranefield Award to Tsung-Yu Chen

113 Jerod Denton, Keith Nehrke, Xiaoyan Yin, Rebecca Morrison, and Kevin Strange. GCK-3, a newly identified Ste20 kinase, binds to and regulates the activity of a cell cycle–dependent ClC anion channel

127 Wei Wang, Claudia Oliva, Ge Li, Arne Holmgren, Christopher Horst Lillig, and Kevin L. Kirk. Reversible silencing of CFTR chloride channels by glutathionylation

143 Bradley Akitake, Andriy Anishkin, and Sergei Sukharev. The "dashpot" mechanism of stretch-dependent gating in MscS

155 Andriy Anishkin, Chien-Sung Chiang, and Sergei Sukharev. Gain-of-function mutations reveal expanded intermediate states and a sequential action of two gates in MscL

171 László Csanády, Donna Seto-Young, Kim W. Chan, Cristina Cenciarelli, Benjamin B. Angel, Jun Qin, Derek T. McLachlin, Andrew N. Krutchinsky, Brian T. Chait, Angus C. Nairn, and David C. Gadsby. Preferential phosphorylation of R-domain serine 768 dampens activation of CFTR channels by PKA

187 Mari Ekman, Katarina Fagher, Mia Wede, Karolina Stakeberg, and Anders Arner. Decreased phosphatase activity, increased Ca^{2+} sensitivity, and myosin light chain phosphorylation in urinary bladder smooth muscle of newborn mice

197 Alexander Zholos, Benjamin Beck, Vadym Sydorenko, Loïc Lemonnier, Pascal Bordat, Natalia Prevarskaya, and Roman Skryma. Ca^{2+}- and volume-sensitive chloride currents are differentially regulated by agonists and store-operated Ca^{2+} entry

213 Guangping Zhang and Frank T. Horrigan. Cysteine modification alters voltage- and Ca^{2+}-dependent gating of large conductance (BK) potassium channels

237 Thomas H. Pedersen, Frank de Paoli, and Ole B. Nielsen. Increased excitability of acidified skeletal muscle: role of chloride conductance

247 Acknowledgment

VOLUME 125 • NUMBER 3 • MARCH 2005

249 Chee Chew Lim and Douglas B. Sawyer. *Commentary:* Modulation of cardiac function: titin springs into action

253 Daniel H. Cox. *Commentary:* The BK_{Ca} channel's Ca^{2+}-binding sites, multiple sites, multiple ions

257 Norio Fukuda, Yiming Wu, Preetha Nair, and Henk L. Granzier. Phosphorylation of titin modulates passive stiffness of cardiac muscle in a titin isoform-dependent manner

273 Xu-Hui Zeng, Xiao-Ming Xia, and Christopher J. Lingle. Divalent cation sensitivity of BK channel activation supports the existence of three distinct binding sites

287 Sergei S. Nikonov, Lauren L. Daniele, Xuemei Zhu, Cheryl M. Craft, Anand Swaroop, and Edward N. Pugh Jr. Photoreceptors of $Nrl^{-/-}$ mice coexpress functional S- and M-cone opsins having distinct inactivation mechanisms

305 Roope Männikkö, Shilpi Pandey, H. Peter Larsson, and Fredrik Elinder. Hysteresis in the voltage dependence of HCN channels: conversion between two modes affects pacemaker properties

327 Hua Yang, Huisheng Liu, Zhitao Hu, Hongliang Zhu, and Tao Xu. PKC-induced sensitization of Ca^{2+}-dependent exocytosis is mediated by reducing the Ca^{2+} cooperativity in pituitary gonadotropes

335 Li Hua and Sharona E. Gordon. Functional interactions between A' helices in the C-linker of open CNG channels

345 Correction

VOLUME 125 • NUMBER 4 • APRIL 2005

347 Shai D. Silberberg, Tsg-Hui Chang, and Kenton J. Swartz. Secondary structure and gating rearrangements of transmembrane segments in rat $P2X_4$ receptor channels

361 Silvia G. Bompadre, Tomohiko Ai, Jeong Han Cho, Xiaohui Wang, Yoshiro Sohma, Min Li, and Tzyh-Chang Hwang. CFTR gating I: characterization of the ATP-dependent gating of a phosphorylation-independent CFTR channel (ΔR-CFTR)

377 Silvia G. Bompadre, Jeong Han Cho, Xiaohui Wang, Xiaoqin Zou, Yoshiro Sohma, Min Li, and Tzyh-Chang Hwang. CFTR gating II: effects of nucleotide binding on the stability of open states

395 Patricio Orio and Ramon Latorre. Differential effects of β1 and β2 subunits on BK channel activity

413 Hyeon-Gyu Shin and Zhe Lu. Mechanism of the voltage sensitivity of IRK1 inward-rectifier K^+ channel block by the polyamine spermine

427 Yun-Min Zheng, Qing-Song Wang, Rakesh Rathore, Wan-Hui Zhang, Joseph E. Mazurkiewicz, Vincenzo Sorrentino, Harold A. Singer, Michael I. Kotlikoff, and Yong-Xiao Wang. Type-3 ryanodine receptors mediate hypoxia-, but not neurotransmitter-induced calcium release and contraction in pulmonary artery smooth muscle cells

VOLUME 125 • NUMBER 5 • MAY 2005

441 Olaf Sparre Andersen. *Editorial*

443 King-ho Cheung, George P.H. Leung, Matthew C.T. Leung, Winnie W.C. Shum, Wen-liang Zhou, and Patrick Y.D. Wong. Cell–cell interaction underlies formation of fluid in the male reproductive tract of the rat

455 Maria del Pilar Gomez and Enrico Nasi. On the gating mechanisms of the light-dependent conductance in *Pecten* hyperpolarizing photoreceptors: does light remove inactivation in voltage-dependent K channels?

465 Ya-Chin Yang and Chung-Chin Kuo. An inactivation stabilizer of the Na^+ channel acts as an opportunistic pore blocker modulated by external Na^+

483 Natalya Ivashikina, Rosalia Deeken, Susanne Fischer, Peter Ache, and Rainer Hedrich. AKT2/3 subunits render guard cell K^+ channels Ca^{2+} sensitive

493 Nazzareno D'Avanzo, Hee Cheol Cho, Illya Tolokh, Roman Pekhletski, Igor Tolokh, Chris Gray, Saul Goldman, and Peter H. Backx. Conduction through the inward rectifier potassium channel, Kir2.1, is increased by negatively charged extracellular residues

505 Robert E. Dempski, Thomas Friedrich, and Ernst Bamberg. The β subunit of the Na^+/K^+-ATPase follows the conformational state of the holoenzyme

VOLUME 125 • NUMBER 6 • JUNE 2005

521 Stephen H. Loukin, Mario M.-C. Kuo, Xin-Liang Zhou, W. John Haynes, Ching Kung, and Yoshiro Saimi. *Brief Review:* Microbial K^+ channels

529 Michael I. Kotlikoff and N. Yvonne Tallini. *Commentary*: Imaging dynamic cellular events in the lung

531 Sidney A. Simon and Ivan E. de Araujo. *Commentary*: The salty and burning taste of capsaicin

535 Jose F. Perez and Michael J. Sanderson. The frequency of calcium oscillations induced by 5-HT, ACH, and KCl determine the contraction of smooth muscle cells of intrapulmonary bronchioles

555 Jose F. Perez and Michael J. Sanderson. The contraction of smooth muscle cells of intrapulmonary arterioles is determined by the frequency of Ca^{2+} oscillations induced by 5-HT and KCl

569 Vijay Lyall, Gerard L. Heck, Tam-Hao T. Phan, Shobha Mummalaneni, Shahbaz A. Malik, Anna K. Vinnikova, and John A. DeSimone. Ethanol modulates the VR-1 variant amiloride-insensitive salt taste receptor. I. Effect on TRC volume and Na^+ flux

587 Vijay Lyall, Gerard L. Heck, Tam-Hao T. Phan, Shobha Mummalaneni, Shahbaz A. Malik, Anna K. Vinnikova, and John A. DeSimone. Ethanol modulates the VR-1 variant amiloride-insensitive salt taste receptor. II. Effect on chorda tympani salt responses

601 Anita M. Engh and Merritt Maduke. Cysteine accessibility in ClC-0 supports conservation of the ClC intracellular vestibule

619 Jill Thompson and Ted Begenisich. Two stable, conducting conformations of the selectivity filter in *Shaker* K^+ channels

631 Haoyu Zeng, Thomas M. Weiger, Hong Fei, Angela M. Jaramillo, and Irwin B. Levitan. The amino terminus of Slob, Slowpoke channel binding protein, critically influences its modulation of the channel

641 David Holcman and Juan I. Korenbrot. The limit of photoreceptor sensitivity: molecular mechanisms of dark noise in retinal cones
